

SING THE WORLD

MUSICAL EDUCATION PROJECT

www.singtheworld.eu

“Sing the World” aims to give the European schools the opportunity to live a unique experience, involving students, teachers and parents in the recording, edition and premiere of a DVD with songs from all over the World, with special emphasis for the traditional music of the old continent.

Born in Portugal in 2000, it's an initiative that has extended to Spain in 2008 and more recently, to France and Ireland, with the adhesion of hundreds of school communities around Europe.

“Sing the World” is a project of strong emotions that promotes the identity of the educational institution, instigates the sharing and union of the school community and actively contributes to the discovery of a unique legacy in the World - its musical heritage.

The Project

"Sing the World" brings the richness of the musical heritage from all around the world to the European youth, inviting students, teachers and parents from an educational institution to participate in the rehearsals, recordings and edition of a DVD with traditional songs from the four corners of the globe. In the end, everyone comes together for a presentation of the accomplished work, in a unique show full of emotions.

1. Rehearsals

After choosing the songs for the DVD, the school will rehearse the students with the help of the music teachers. Teachers and parents are invited to form a group to rehearse their song as well.

2. Recordings

After the rehearsal period, the groups are ready to start recording. For that purpose, a mobile-studio will be set up in the school itself (auditorium, library, music room, etc), so that the recordings can commence (audio and video). In addition to the songs, the hymn of the school is also recorded, which will be created for that purpose.

3. Production of the Master DVD

The contents captured in the school are then edited in studio, to give life to the master DVD, which contains the video clips of the songs, the school hymn, its documentary and some interviews made to students and teachers about the project.

4. DVD Premiere

Students, teachers and parents come together for the presentation of the DVD, going up to the stage to sing live the songs recorded. The DVD's are delivered on this day to the parents who ordered it.
